Ada Lovelace

La primera programadora de la historia

Maria Serrano, Tyto Alba

Summary

The first programmer Daughter of the famous romantic poet Lord Byron, Ada Lovelace was the first person who imagined that an algorithm could give indications to a machine so that it could operate autonomously. That is, she was the first one to think that, if humans were capable of writing a sequence of instructions in a language that a machine could understand, maybe the machine could perform these tasks on its own, thus becoming a thinking device. What Ada invented is what is now considered the first computer program in history, although there were still many years to come before computers ever existed. Both the register of the narrative and the style of the images are appropriate for schoolchildren between 8 and 11 years old. The text and the images make sure to deal with pedagogical threads that traverse the characters' scope of activity, both for family readings at home and at school, supporting the educational program. Additionally, throughout the narrative the reader will find all the information necessary to appropriately situate the figure in a socio-historical context.

Contributor Bio

Maria Serrano works as publisher and translator. For many years her work as publisher has specialized in the field of design and visual culture, and between 2008 and 2011 she was responsible for the Spanish edition of the magazine *Étapes*. As a translator she has worked with books of analysis and essay of the most diverse topics. **Tyto Alba** took his first professional steps as a painter, exhibiting in various galleries in Barcelona. He began his career as a cartoonist during a stay in Mexico, D. F., where he made his comic "Black River Together" and several short comics for different publications.

Amor 2.0

Una nueva mirada a la emoción que determina lo que sentimos, pensamos, hacemos y somos

Barbara Fredrickson

Summary

Todos hemos escuchado la expresión "el poder del amor". Sin embargo, en este libro Barbara Fredrickson le da un nuevo y más profundo significado a estas palabras. Para la autora, el amor es la clave para mejorar la salud mental y física, así como para alargar nuestra vida. Ello se desprende de sus investigaciones clínicas, las cuales muestran que el amor (entendido no como ese sentimiento arrebatado de raíz romántica, sino como los "momentos de conexión significativa entre las personas") es capaz de producir resultados sorprendentes sobre nuestro cuerpo y nuestra psique.

We have all heard the expression "the power of love." However, in this book Barbara Fredrickson gives a new and deeper meaning to these words. For the author, love is the key to improving mental and physical health, as well as extending our lives. This emerges from their clinical investigations, which show that love (understood not as that feeling taken away from a romantic root, but as the "moments of significant connection between people") is capable of producing surprising results on our body and our psyche.

Contributor Bio

Barbara Fredrickson has a PhD in social psychology from Stanford University. She works as a professor of psychology and is director of the Laboratory of Psychophysiology at the University of North Carolina at Chapel Hill. She is the author of numerous articles in specialized magazines.

Blanco y negro

Meritxell Martí

Summary

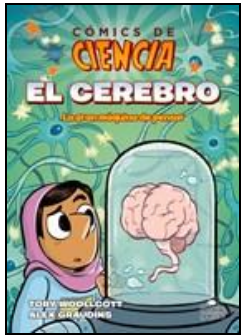

A board book of concepts explained with images and a word for each one. All the word-images are related to black and white and follow a circular narrative thread through the images. On each double page there is an illustrated element that plays with these two colors, for example: the moon, a cobweb, a piano, a fridge, penguins, a zebra crossing, cows, the snow, a snowman, a Dalmatian, the night and thus up to 22 concepts.

Contributor Bio

Meritxell Martí is an artist, a composer, a musician, an award-winning author of more than 30 books, and an art and literature professor. She is the author of *La isla de las 160 diferencias* and *Me llamo Mozart*, as well as many other books.

El cerebro

La gran máquina de pensar

Alex Graudins, Tory Woollcott

Summary

Fahama cayó presa del Dr. Cerebellum y su asistente zombie, y su única salvación es hacerlo hablar incansablemente sobre el cerebro. Incapaz de resistirse, el científico loco le explicará a su rehén todo sobre las neuronas, cuáles son las partes del cerebro y sus funciones, cómo opera la memoria, cómo se conforma la personalidad, qué pasa con los sentidos y cuál es la historia de nuestras ideas sobre este indispensable y complejo órgano, entre muchas otras cosas. Lleno de humor y chistes "malos", El cerebro es una introducción completa al sistema nervioso central en un formato accesible y divertido. El cerebro es parte de la nueva colección Cómics de Ciencia del sello Historias Gráficas. Cada libro tiene un tema principal que sirve como hilo conductor para hablar sobre diversas disciplinas científicas, y su formato ayuda a que la lectura sea ágil sin perder precisión.

Fahama fell prey to Dr. Cerebellum and his zombie assistant, and his only salvation is to make him speak tirelessly about the brain. Unable to resist, the mad scientist will explain to his hostage everything about neuro...

Contributor Bio

Alex Graudins is a cartoonist and illustrator graduated from the School of Visual Arts cartoonist program. He is passionate about comics that talk about friendship and anxiety. *The Brain* is his first book, which represented enormous learning in many ways. **Tory Woollcott** is a cartoonist, writer and promoter of reading. Her first graphic novel, *Mirror Mind*, is a remembrance of what it's like to grow up with dyslexia. Since then she has written and illustrated other autobiographical comics, children's fairy tales, and science fiction dramas.

Cinco destinos oscuros

Kendare Blake

Summary

After the battle with Katharine, the rebellion was in tatters. The curse of the Jules legion was unleashed, knocking her out of the battle. Arsinoe must find his cure, in addition to carrying the responsibility of stopping the devastating fog on his shoulders. Mirabella disappears without explanation. Queen Katharine's rule over Fennbirn is barely sustained. The mist attacks and the rebellion finds new allies. Katharine has lost her beloved Pietyr and cannot trust anyone. Will she be able to make a truce with Mirabella and endure the constant onslaught of the dead queens? In this conclusion of the Three Dark Crowns series, the dark sisters will rise to fight each other and against the ancient secrets of the island of Fennbirn. Loyalties will change and ties will be tested ... Many will be broken forever.

Contributor Bio

Kendare Blake is a graduate of Ithaca College, in Ithaca, New York and received a Master of Arts in Creative Writing from Middlesex University in London, England. Her books have been translated into eighteen languages and featured on various "best of the year" lists.

Cómo ser un hombre

Guía de estilo y comportamiento para el caballero moderno

Glenn O'Brien

Summary

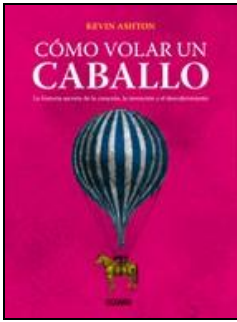

With an indisputable knowledge of cause and great doses of humor, Glenn O'Brien reveals in this work the secrets that every man must know to be a true gentleman. Much more than a series of tips on clothing and good manners, these pages are a true immersion in refinement and good taste, even in the most challenging situations. For example, the author teaches us what a well-born man needs to know in order not to look silly, to insult someone who deserves it, to get along in a fight, to dress like a dandy, to become famous, and so on. A classic of style and good manners, and one of the funniest books on the subject.

Contributor Bio

Glenn O'Brien is a journalist, editor, and playwright. He is the author of the famous column "The Style Guy" in *GQ* magazine, which has been setting trends in men's fashion for years. He has worked as the editor of numerous magazines, including *Interview Magazine*, *Art in America* and *Antiques*.

Cómo volar un caballo

La historia secreta de la creación, la invención y el descubrimiento

Kevin Ashton

Summary

According to this myth, the revolutionary ideas, the most exquisite manifestations of art and the most important inventions that arose in different stages of humanity, have been achieved in contexts of divine revelation or thanks to an innate gift that distinguishes the geniuses from the ordinary individuals. Contrary to these ideas, the author claims that creative people spend most of their time working, overcoming their doubts and failings, ridicule and rejection, until their effort is rewarded with a useful idea or product and innovative. How to Fly a Horse brings together stories from different characters in science, history and philosophy, among other areas, who have stood out for their significant contributions. Despite coming from different contexts and times, when viewed together, these stories reveal a pattern about creativity processes that is both inspiring and challenging.

Contributor Bio

Kevin Ashton is a pioneer in radio frequency identification (RFID) work, for which he coined the term "Internet of Things". He is a co-founder of the Auto ID Center at MIT. He has written about innovation and technology in *Quartz*, *Medium*, *The Atlantic* and *The New York Times*.

Cousteau

El descubridor de los mares

Philippe Zwick Eby, Chaaya Prabhat

Summary

This volume tells the story of Jacques Cousteau, the legendary explorer who discovered the wonders of the underwater world, so close to our lives up to then, and yet so unknown. This exciting epic is narrated by Philippe, Commander Cousteau's younger son, and in it we will read about his father's inventions and exciting expeditions aboard the Calypso. We will also learn about the majestic creatures he came to meet in his travels and the dangers these creatures face on account of the human species' invasive and destructive habits. The author visited Jan Cousteau, Cousteau's daughter-in-law and widow of his son Philippe, the main character of the book. The author met with her in Washington. Jan excitedly handed over to us for publication the letter she had received from Philippe when he was on an expedition. In addition to Philippe's letter, this title includes a postcard and a second letter simulating Philippe's correspondence with his mother, when he was at boarding school and his parents were travelling around the world on Calypso.

Contributor Bio

Philippe Zwick Eby works as a teacher, film director, screenwriter and artist in San Francisco. He has also worked as a graphic designer and illustrator. **Chaaya Prabhat** is a graphic designer and illustrator. She has worked with various clients such as Snapchat, Google, and the Obama Foundation. She has previously received awards for her portfolio and projects from Behance and Adobe.

Ecopoemas Nicanor Parra

El cielo se está cayendo a pedazos

Nicanor Parra

Summary

El presente volumen de Nicanor Parra es la primera antología completa, y en edición de lujo, de los eco poemas del gran poeta chileno, creador de la antipoesía y Premio Cervantes 2011. Por eco poemas se entienden todas aquellas composiciones del autor dedicadas a la temática ecológica y la conservación del planeta, causa de la que fue militante pionero desde mediados del pasado siglo. El volumen reúne creaciones procedentes de títulos tan fundamentales como Poemas y antipoemas (1954), Eco poemas (1982) o Poesía política (1983), y a la vez reproduce a gran formato los artefactos visuales del autor, tan geniales e incisivos como los poemas visuales de Joan Brossa. La antología y los comentarios corren a cargo de Niall Binns, profesor de literatura hispanoamericana de la Universidad Complutense de Madrid y especialista en la vida y la obra de Parra.

This Nicanor Parra volume is the first complete anthology, and in a deluxe edition, of the eco poems of the great Chilean poet, creator of anti-poetry and winner of the 2011 Cervantes Prize. By eco poems we understand all those compositions of th...

Contributor Bio

Nicanor Parra is a Chilean poet, mathematician, and physicist. He is a key figure of twentieth-century Spanish-American poetry, winner of the Miguel de Cervantes Prize in 2011, and Chile's National Literature Prize in 1969.

El efecto elefante

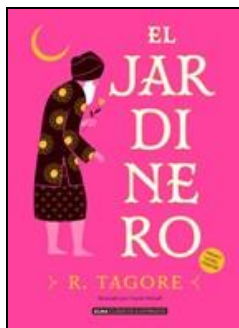

Marisa Potes

Summary

Although no one knows, the Time Guards exist: a group of youths responsible for resolving anomalies in history. To do so, they travel into the past moment and place to correct them. However, as the anomalies grow, the agents work relentlessly, risking themselves further to discover what is creating them. Laura, the newest agent, has persistently pushed herself to fix the past so that history can continue as we know it. Because if one detail is altered, it could unleash the Elephant effect.

Contributor Bio

Marisa Potes is a teacher and novelist recognized for her participation in literary festivals, workshops, and seminars. She is the author of numerous books, including *Malacara*, *Quería ser monstruo*, and *Prisionero de la luna*, and has written various short stories

El jardinero

Rabindranath Tagore

Summary

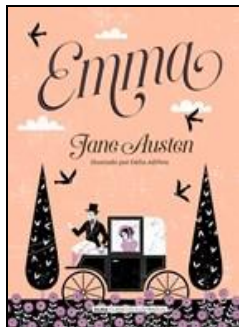

Poet, essayist, composer and painter, Rabindranath Tagore was the first non-European writer to win the Nobel Prize for Literature in 1913. With his venerable guru appearance, he traveled the world and was the representative of Eastern wisdom and symbol of the movement. In 1914 he published *The Gardener*, a collection of poems that constitutes one of the most enduring examples of the simple but profound style with which Tagore knew how to captivate several generations of readers.

Contributor Bio

Rabindranath Tagore was a Bengali poet, novelist, musician, painter, and playwright. His lyrical poetry and novels gained him worldwide acclaim, and he was the first Asian to receive the Nobel Prize for Literature, primarily for his work *Gitanjali*. He wrote over one thousand poems; eight volumes of short stories; almost two dozen plays; eight novels; and many books and essays on philosophy, religion, education, and social topics. His other great love was music, and he composed more than two thousand songs, both the music and lyrics.

Emma

Jane Austen, Dàlia Adillon

Summary

Emma was the last novel that Jane Austen published while alive. In it, she tells us about the adventures of Emma Woodhouse, a young English woman raised in a wealthy family who not only does not have the slightest intention of getting married, but also insists on being a matchmaker for her circle of friends. In particular, for her protégé Harriet Smith. Emma's advice produces all kinds of misunderstandings and embarrassing situations, which translates into a fun work that, two centuries after its appearance, continues to delight readers.

Contributor Bio

Jane Austen is a renowned British novelist whose works are considered classics in the world of English literature. **Dàila Adillon** received a degree in fine arts from the University of Barcelona and obtained her art teacher certification from the same university. She works as an illustrator.

Enfermos antiguos

Vicente Valero

Summary

An old social custom –that of visiting the sick– becomes, in this new novel by Vicente Valero, the unique pretext for the creation of an original and attractive mosaic of stories and portraits. As in *The Transitions* (Peripheral, 2016), the narrator returns to the childhood years and his native island to inquire into the state of a society that is about to witness the death of Franco and the beginning of the Transition. But *Old Patients*, in addition to being an implacable portrait of the society of those years, is above all a novel about childhood, with its unusual discoveries and ephemeral certainties, which foster a juicy and fun anecdote. The story, in short, of a convulsive learning in times of profound and decisive changes, in which the reader will be able to find situations and characters as close as they are unforgettable.

Contributor Bio

Vicente Valero is one of the leading poets of his generation. He is also the author of many novels such as *Los extraños*, *El arte de la fuga* and *Las transiciones*.

Escarcha como noche

Sara Raasch

Summary

Meira will do anything to save her world. With Angra trying to break her mental defenses, she desperately needs to learn to control her magic; So when the leader of a mysterious Paisly order offers to teach her, she accepts the opportunity. But the real solution to stopping the Decline lies in a deep maze below the Seasonal Realms. In order to defeat Angra, Meira will have to enter the labyrinth, destroy the magic she is learning to control, and make the greatest sacrifice. Mather will do anything to save his queen. You need to gather the Children of the Thaw, find Meira, and finally acknowledge her feelings. But with an attack plan that leaves no kingdom unscathed and great treason within its ranks, winning the war - and protecting Meira - is increasingly out of reach. Ceridwen will do anything to save her people. Angra killed her brother, stole her kingdom and made her prisoner. But when she is freed by an unexpected ally who reveals a shocking truth about the Summer slave trade, Ceridwen must take steps to save her true love and kingdom, even if it costs her little. Angra unlease...

Jack Escarcha

El final es el principio

William Joyce

Summary

Many years—and an epic battle—have passed since we last saw our Guardians. The battle claimed Sombra's freedom, but it also caused one of the Guardians to change forever. Nightlight, one of Catherine's closest companions, became Jackson Overland Frost or Jack Frost. Over time, various events occur: two world wars and the Great Depression. But a greater evil lurks. All the Guardians have a feeling, especially Jack. And he is the only one who can stop him ... but to do so, he must tell his story, the last in the Guardians saga: the story of how he became Jack Frost.

Contributor Bio

William Joyce is an author, a filmmaker, and an illustrator whose work has garnered critical and commercial praise across a range of children's media. His picture books include *Dinosaur Bob and His Adventures with the Family Lizardo*, *The Leaf Men*, and *Santa Calls*; he has won three Emmy Awards for his animated series *Rolie Polie Olie*; and the animated short film *The Fantastic Flying Books of Mr. Morris Lessmore*, which he codirected, won an Oscar for Best Animated Short Film. Joyce's illustrations have also appeared numerous times on the cover of the *New Yorker* and his paintings are on exhibit at museums and art galleries across the United States. He lives in Shreveport, Louisiana.

La avería

Friedrich Dürrenmatt

Summary

A breakdown in his new Studebaker sports car, and the hope of "living some extramarital adventure", lead textile traveler Alfredo Traps to spend the night in a small town on his usual route. Your hosts, a retired judge and some disturbing colleagues with whom you are going to share the evening (a lawyer, a prosecutor and an executioner), will propose you to participate in a macabre game: to be the accused. The breakdown is an unpredictable nouvelle as the best police intrigue and relentless as a classic tragedy. Filmed on several occasions, this work is perhaps the most perfect investigation into one of the author's favorite themes: the foundation of the principle of justice. The bourgeois double morality, the concept of freedom and individual responsibility or the affinity between moral and aesthetic judgment in a world that overturns the concept of evil for that of fault or error, also run through this text: great literature that does not copy reality It "threatens to become reality" itself.

Contributor Bio

Friedrich Dürrenmatt is one of the essential twentieth-century writers and intellectuals in the German language.

La biblioteca secreta

Jaume Copons, Liliانا Fortuny

Summary

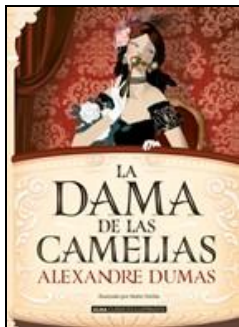

Hello! I'm Agus Pianola and, believe it or not, I live with a gang of monsters (good guys, huh?). One of them, Mr. Flat, is my best friend. My neighbor, Lidia, always has great ideas. Together we try to stop the follies that Dr. Brot and his assistant Nap are planning. I don't know how we will get out of this. Collective 541 is convincing all of Galena that there are dangerous books and that they must be killed. Peter Pan, Snow White, Cinderella and Tom Sawyer's adventures are in danger. Will you help us save them?

Contributor Bio

Jaume Copons is a former instructor of language and literature, a screenwriter, and the author of the Agus y los monstruos series. **Liliana Fortuny** is an illustrator and an animator.

La dama de las camelias

Alexandre Dumas

Summary

Alexandre Dumas gained critical and public admiration with the publication of *The Lady of the Camellias* which became one of the most popular novels of all time. Based on the author's experiences, the book tells the relationship between the young Armand Duval and the courtesan Marguerite Gautier, one of the most tragic, beautiful, sad and enduring love stories ever written.

Contributor Bio

Alexandre Dumas was one of the literary lights of France during the Romantic Revolution. His complete works eventually filled more than 300 volumes. He is best known as the author of *The Count of Monte Cristo* and *The Three Musketeers*.

La llave de Blake

Sandra Andrés Belenguer

Summary

August 12, 1827, London. A frame. A work of art whose creator insists on frantically ending in the dim light of his room. Suddenly, something moves in the shadows. An intense darkness invades everything. That would be the last creation of William Blake. Professor Peter White, previously loved and admired by everyone, lives locked up in his office. His daughter Rachel is the only one who suffers from his increasingly strange attitude. Rachel is a young woman with exceptional intelligence, fascinated by the world of art and the occult. Since she was little, her parents taught her to find and decipher the little hidden messages in great works of art. Together with her friend Andrew she has a radio program on the internet, in which they collect and analyze paranormal testimonies and experiences from beyond. During one of these sessions, Rachel receives a message that makes her blood run cold: "The mouth is opening. Find the key. That same night, her father dies under strange circumstances. From that moment, Rachel must find out what her father was up to, putting into practice everything ...

Contributor Bio

Sandra Andrés Belenguer has a degree in hispanic philology from the University of Zaragoza. She is a writer of youth-adult books such as *El violín negro* and *La hija de los Sueños* among many others. She has given multiple conferences and masterclasses at the national and international level, and has a wide experience thanks to which she has accumulated thousands of readers.

Las brujas de Ariete

Bel Olid

Summary

There were seven Witches of Ram until a mysterious egg was found. What is inside? A terrible spell or stinky monsters? None of the seven can imagine what they have brought to the Ariete forest.

Contributor Bio

Bel Olid is a writer, translator, and professor of language, literature, translation, and creative writing. She has received several literary awards and has served as the president of the Association of Writers in Catalan since March 2015.

Lise Meitner

La física que inventó la era atómica

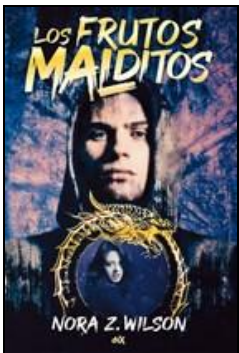

Mónica Rodríguez, África Fanlo

Summary

Lise Meitner The Physicist Who Started the Atomic Age Lise Meitner was an excellent researcher in nuclear physics whose works kickstarted the atomic age. She contributed so much to science that she undoubtedly deserved the Nobel Prize. However, she was never granted one, most likely because she was a woman working in a field previously reserved for men. She was also the protagonist of an exciting life, victim of persecutions that marked European history during the first half of the 20th century. Both the register of the narrative and the style of the images are appropriate for schoolchildren between 8 and 11 years old. The text and the images make sure to deal with pedagogical threads that traverse the characters' scope of activity, both for family readings at home and at school, supporting the educational program. Additionally, throughout the narrative the reader will find all the information necessary to appropriately situate the figure in a socio-historical context.

Contributor Bio

Mónica Rodríguez holds a degree in physical sciences, with a master's degree in nuclear energy. For fifteen years she worked at a research center, the Ciemat, in training in Radiological Protection and Nuclear Energy. In 2003 she published his first children's book and in 2009 she decided to devote herself entirely to children's and youth literature. She has published nearly forty books, has received numerous awards and recognitions. **África Fanlo** graduated in fine arts from the University of Barcelona, in 2000 she joined the publishing world and began a long career as an illustrator of children's books, with more than 30 published titles. For 10 years she has been a teacher at the Escola de Artes y Oficios Massana in Barcelona.

Los frutos malditos

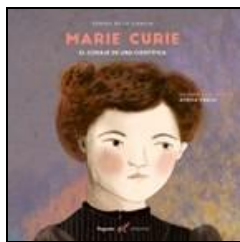

Nora Wilson

Summary

Hervé Manath is 17 years old when he arrives at a new school. He is a withdrawn and peculiar teenager, on whom a curse weighs: he needs to absorb the life of human beings to survive. This has condemned him not to create ties, but the popular and happy Dante manages to penetrate all his barriers and establish a friendship, and from his hand comes Helena, who will completely turn her world. Torn between his hunting instinct, his conviction of being dark and soulless, and the illusion of having a normal life, he awkwardly begins to open up to his friends; but his happiness turns to ashes when someone discovers it; someone who has the key to leave his life in ruins ... or free him forever from his curse. At times innocent and at times cruel, Los malditos malditos is a novel that realistically shows the intimacy in the lives of adolescents with their doubts, weaknesses and fears, with their acts full of kindness and those that can activate the darkest part of their hearts.

Contributor Bio

Nora Z. Wilson studied communication sciences with script and narrative workshops. She began to dedicate herself independently to the fictional and documentary script, and when she finished her studies, she began working on television scripts.

Marie Curie

El coraje de una científica

África Fanlo, Valeria Edelszstein

Summary

Marie Curie A Scientist's Courage Marie Curie-Sklodowska was one of the most brilliant scientists in history and a pioneer in every possible way: she was the first woman to win a Nobel Prize; the first to be a professor at the Sorbonne; the first person to be awarded twice with the Nobel Prize and, to this day, the only one who has achieved it in two different scientific areas. Despite all this recognition, she was never allowed to enter the French Academy, an obvious case of sexist discrimination. However, today we know that the importance of all her contributions to society is incalculable. Both the register of the narrative and the style of the images are appropriate for schoolchildren between 8 and 11 years old. The text and the images make sure to deal with pedagogical threads that traverse the characters' scope of activity, both for family readings at home and at school, supporting the educational program. Additionally, throughout the narrative the reader will find all the information necessary to appropriately situate the figure in a socio-historical context.

Contributor Bio

Valeria Edelszstein is an Argentinian scientist well known for her work as a science teacher and communicator. She studied chemistry and obtained a bachelor's degree and later a doctorate from the University of Buenos Aires. She started working at CONICET as a researcher. She also participates as a columnist in radio and television programs and is the author of several primary and middle-level textbooks. **África Fanlo** graduated in fine arts from the University of Barcelona, in 2000 she joined the publishing world and began a long career as an illustrator of children's books, with more than 30 published titles. For 10 years she has been a teacher at the Escola de Artes y Oficios Massana in Barcelona.

La quietud es la clave

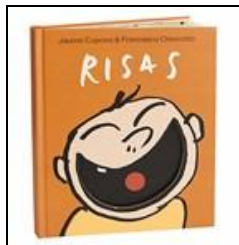

Ryan Holiday

Summary

The most lucid minds in history have had something in common that has allowed them to control their emotions, avoid distractions, discover new ways of looking at the world and achieve all their goals. Zen Buddhist thinkers called it inner peace, an essential characteristic for samurai and monks alike. Stoics and Epicureans baptized it as ataraxia, a bastion against the passions of the crowd, indispensable for leadership and the search for truth. Ryan Holiday calls it stillness: the ability to maintain stability as the world turns chaotically around us. Stillness is the key. It describes a way to reach that state through the body, the mind and the spirit. From the work of thinkers ranging from Confucius, Marco Aurelio and Seneca to John Stuart Mill and Friedrich Nietzsche, Holiday explains that stillness is not mere inactivity, but the threshold that allows us to access mastery, discipline and concentration. Enriched with contemporary examples from leaders and artists such as Winston Churchill, Anne Frank, Tiger Woods, and Marina Abramovi and written in her characteristic direct and ...

Contributor Bio

Ryan Holiday is an American writer, marketer, and entrepreneur interested in personal and corporate development. He is the media editor for the *New York Observer* and has written for *Forbes*, *The Huffington Post*, and others. He also wrote *Trust Me, I'm Lying*.

Rosalind Franklin

El secreto de la vida

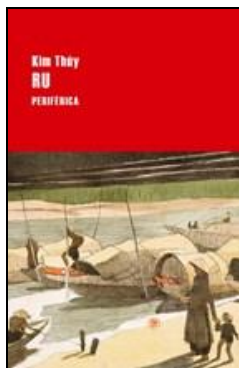

Miguel Vicente, Maria Padilla

Summary

The secret of life Rosalind Franklin was one of the most influential chemists of the 20th century. An expert in the use of X-rays, she unveiled one of Nature's best kept enigmas: the structure of DNA, the molecule that ensures that all of us, humans, animals, plants and other organisms, look like our progenitors. Rosalind Franklin's life is an example of improvement and work, having contributed to the discovery of the secret of life. Both the register of the narrative and the style of the images are appropriate for schoolchildren between 8 and 11 years old. The text and the images make sure to deal with pedagogical threads that traverse the characters' scope of activity, both for family readings at home and at school, supporting the educational program. Additionally, throughout the narrative the reader will find all the information necessary to appropriately situate the figure in a socio-historical context.

Contributor Bio

Miguel Vicente is a research Professor at CSIC. He runs a lab at the National Center for Biotechnology. He holds a PhD in biological sciences from the Central University (Complutense) of Madrid. **Maria Padilla** studied arts and later illustration at the Eina School of Art and Design. Her career began in the art world, with exhibitions in Barcelona and Berlin, and then she gradually began to move towards illustration. She currently works combining editorial projects and stories for children and adults.

Ru

Kim Thúy

Summary

The word Ru, chosen by Kim Thúy as the title of this beautiful novel, means "nursery rhyme" in Vietnamese, his mother tongue, and "creek" in French, his adopted language. Taking the form of the flow of a stream, the narration navigates the passage through a refugee camp in Malaysia and the beginning of a new immigrant life in Canada. Thúy recreates with great delicacy and light a story that took thirty years to decide to write: his own. Impelled by the duty to remember, the novel does not evade the account of the difficulties that a human being must face, who is facing a process of reinvention imposed by exile. However, its starting point is the serenity and gratitude of those who, despite everything, feel the obligation to be happy.

Contributor Bio

Kim Thúy is an author who has achieved great international success and performed various types of jobs. She's been a seamstress, interpreter, lawyer at one of the most prestigious Canadian law firms, restaurant owner, and a food critic for radio and television. Her later novels, *Mãn* and *Vi* also garnered rave reviews. Her work has been translated into numerous languages.

Scrum

El arte de hacer el doble de trabajo en la mitad de tiempo

Jeff Sutherland

Summary

The author of this book has been interested in the topic of business management and in recent years developed a method called "Scrum" that has allowed numerous companies to obtain outstanding results. It is a project management method that is based on team responsibility and customer participation. The effectiveness of such a system does not only apply to companies, but also outside of them.

Contributor Bio

J.J. Sutherland is a military man by training, graduated from the United States Military Academy, where he graduated as a combat pilot. He was involved in more than one hundred missions in Vietnam. Later he studied at Stanford and has a postgraduate degree at the University of Colorado School of Medicine. He is the director of Scrum Inc. and senior advisor to Openview Venture Partners, where he advises companies with high-risk capital.

Scrum. Manual de campo.

Una clase magistral para acelerar el desempeño, obtener resultados y planear el futuro

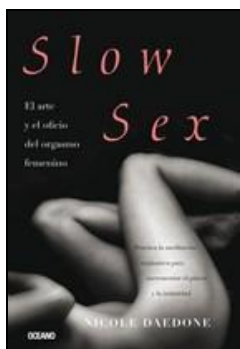

Jeff Sutherland

Summary

Based on years of experience advising dozens of companies such as Bosch, 3M, Schlumberger and Saab, Scrum. Field Manual presents a practical approach to successfully implement the Scrum method in companies of any turn. Originally developed in the field of software programming, the Scrum method, which was unveiled in the best-selling book of the same name, has represented a revolution in results-based project management. Now, this new volume by J.J. Sutherland, CEO of Scrum Inc., leverages its author's knowledge in the field of advising leaders, managers, and employees to explain how Scrum can be successfully applied to any project in any industry, from automakers to non-profit organizations. for profit, from construction contractors to gas exploration companies, from fighter jet builders to the navy and the military.

Contributor Bio

Jeff Sutherland is the CEO of Scrum Inc., a consulting and staff training company that uses Scrum to deliver agile results in companies around the world. He has been a correspondent, producer and head of the NPR office in Baghdad; it covered the wars in Iraq and Afghanistan, the Arab Spring and the ravages of the 2011 tsunami in Japan. For his journalistic work he has received the Dupont, Peabody, Edward R. Awards.

Slow Sex

El arte y el oficio del orgasmo femenino

Nicole Daedone

Summary

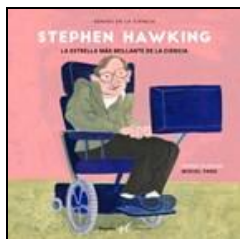

This guide offers women a technique to improve and make their sexual experiences more pleasant. Nicole Daedone, an expert in sexuality and human relations, makes available to readers a practice known as "orgasmic meditation", which allows the intimate encounter to be "slowed down", made more meaningful and for the couple to connect better on an emotional level. The work includes exercises and practices that, in a few days, improve your relationships in and out of bed.

Contributor Bio

Nicole Daedone is a speaker, instructor, and writer. She studied at San Francisco State University. She has specialized in the study of female orgasm. She has broadcast her work on television in such important programs as ABC's Nightline, and in print media, such as the New York Times, New York Post and the San Francisco Chronicle. She is the founder of OneTaste, an organization dedicated to teaching people to improve their sexual relationships.

Stephen Hawking

La estrella más brillante de la ciencia

Jorge Alcalde, Miguel Pang

Summary

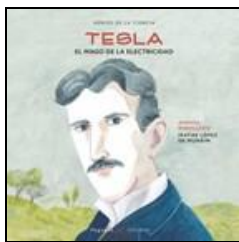

The Brightest Star in Science Stephen Hawking has been one of the most brilliant scientists of the 20th century and the one who best understood the universe. He suffered a serious illness that left him immobilized and continued to study, had children, participated in movies, wrote extraordinary books and even travelled to the space in his wheelchair. He was a genius but, above all, a man with an enormous desire to learn and to live. Both the narrative register and the style of the images are suitable for children between 8 and 11 years old. The text and illustrations deal with didactic themes of the character's fields of activity, especially those related to the world of science, physics and chemistry, both for reading in the family and for use in schools to reinforce the educational program. The final pages of the book contain a summarized biography of the character and a chronology that frames him in the evolution of his discipline, among other outstanding characters.

Contributor Bio

Jorge Alcalde is a journalist, science communicator and writer. He is currently director of the magazines *Quo* and *Esquire*, and a contributor to several programs of the COPE radio chain. He holds a bachelor's degree in information science from Complutense University in Madrid and a degree in communications from the University of South Florida. His work has been recognized by the Nazionale delle Arti Award (Communication Design) 2012, American Illustration 2013 & 2015, Bologna Children's Fair 2014 and Premi Junceda 2016. **Miguel Pang** studied at the Faculty of Fine Arts and Illustration at Escola Massana. His work has been exhibited in cities such as New York, Madrid and Barcelona. He has been awarded by the American Illustration, the Bologna Children's Bookfair, the Premi Junceda and the Society of Illustrators, among others.

Tesla

El mago de la electricidad

Ainhoa Rebolledo, Iratxe López de Munáin

Summary

Nikola Tesla fue el científico que más inventos llegó a crear en la historia de la humanidad. Nació a mediados del siglo XIX y, con su trabajo, ayudó a modernizar el mundo con muchísimos avances basados en la electricidad. ¡A él le debemos la luz de nuestras casas! Muchos de los avances de los últimos 150 años se basan en sus inventos. No es casualidad, por ejemplo, que le hayan puesto su nombre a la marca de coches eléctricos más moderna de la actualidad. Tanto el registro de la narración como el estilo de las imágenes están adecuados a un público de escolares con una franja de edad entre 8 y 11 años. El texto y las imágenes se aseguran de tratar temas didácticos transversales a los ámbitos de actividad del personaje, en especial aquellos relativos al mundo de la tecnología, de cara tanto a la lectura en familia como al uso en centros escolares y al refuerzo al programa educativo. Las páginas finales del libro contienen una biografía resumida del personaje y una cronología que lo enmarca en la evolución de su disciplina, entre otros personajes destacados.

Nikola Tesla was the scient...

Contributor Bio

Ainhoa Rebolledo is a translator and writer. She is the author of the novels *Mari Klinski*, *Tricot* and *Gornú*. She has published articles in *El Butano Popular* and *El Estado Mental* and translated Anne Sexton's correspondence. **Iratxe López de Munáin** studied fine arts at the University of Barcelona, specializing in illustration. Since then, she has published more than twenty titles for children, youth and adults. Her work has been awarded with the 2013 Lazarillo Award, an Honorable Mention in the Ibero-American Catalog VI and twice selected at the Bologna Children's Book Fair, among others.

Zen

Raquel de la Morena, Pedro Estrada

Summary

Yin Zheng is a young woman weathered by years of ascetic Buddhist education and strict martial training at the remote Nepali temple in Kapilavastu, where she is supposed to decide her future by choosing between two paths. But one day the teacher Zhou opens before her the secret and dark third path ... A teenager has been murdered in an elite lyceum near Paris. Crime seems to be the work of the devas, human-like demons who sow negative passions in people - such as jealousy or anger - and then feed on them. Yin will infiltrate the boarding school, as one more student, to find out the identity of the sinister creature and prevent it from killing more students. Will she manage to go unnoticed among her new companions, accustomed to a life of luxury, and untangle the intricate tangle of deceitful relationships and friends that are not what they seem? The deva to be hunted can hide behind the face of any of them, including Alain, a mysterious young man who hides many secrets.

Contributor Bio

Raquel de la Morena works as a journalist for the magazine *Muy Interesante* and has published more than a dozen books, most of them written with her husband, Pedro Estrada. She is mainly known for her solo romance novels, such as *The Heart of the Banshee* or her most recent work, *Who the Hell Are You?* **Pedro Estrada** is also a journalist and works at *Muy Interesante*. When he writes alone, he opts for action, humor and adventure novels, such as his recent children's-youth collection on Vikings titled *Vinlandia*.
